

TSMC Reports Fourth Quarter EPS of NT\$1.31

Hsin-Chu, Taiwan, R.O.C., January 31, 2008 -- TSMC today announced consolidated revenue of NT\$93.9 billion, net income of NT\$34.48 billion, and diluted earnings per share of NT\$1.31 (US\$0.20 per ADS unit) for the fourth quarter ended December 31, 2007.

Year-over-year, fourth quarter revenue increased 25.2% while net income and diluted EPS increased 23.5% and 24.3%, respectively. On a sequential basis, fourth quarter results represent a 5.5% increase in revenue, an increase of 13.5% in net income, and an increase of 14.3% in diluted EPS. All figures were prepared in accordance with R.O.C. GAAP on a consolidated basis.

Stronger than expected demand of TSMC's wafers across all major product segments (communication, computer, and consumer) led to the fourth quarter results approaching or exceeding the high end of the guidance. Advanced process technologies (0.13-micron and below) accounted for 59% of wafer revenues with 90-nanometer process technology accounting for 29% and 65-nanometer reaching 10% of total wafer sales. Gross margin was 47.8%, operating margin was 39.2%, and net margin was 36.7%.

"Fourth quarter set another record for our business in terms of revenues and wafer shipment, while our margins improved sequentially" said Lora Ho, VP and Chief Financial Officer of TSMC. "Although the global economy is facing a large degree of uncertainty, we expect our first quarter to follow a normal seasonal pattern and our results will track with normal seasonality," said Ho. "Based on our current business outlook, and the implementation of a new ROC accounting rule which requires the expensing of employee profit sharing, management's expectations for first quarter 2008 performance are as follows":

- Revenue is expected to be between NT\$87 billion and NT\$89 billion;
- Gross profit margin is expected to be between 42% and 44%;
- Operating profit margin is expected to be between 32% and 34%.

Ho said management also expects that 2008 capital expenditure will be around US\$1.8 billion.

Conference Call & Webcast Notice:

TSMC's quarterly review conference call will be held at 8 a.m. Eastern Time (9 p.m. Taiwan Time) on Thursday, January 31, 2008. The conference call will also be webcast live on the Internet. Investors wishing to access the live webcast should visit TSMC's web site at <http://www.tsmc.com> at least 15 minutes prior to the broadcast. Instructions will be provided on the web site to facilitate the download and installation of necessary audio applications. Investors without Internet access may listen to the conference call, in listen-only mode, by dialing **1-617-614-6204** in the U.S., **852-3002-1672** in Hong Kong, **65-6823-2164** in Singapore, and **44-207-365-8426** in the U.K. (Password: TSMC). An archived version of the webcast will be available on TSMC's web site for six months following the Company's quarterly review conference call and webcast.

Profile

TSMC (TAIEX: 2330, NYSE: TSM) is the world's largest dedicated semiconductor foundry, providing the industry's leading manufacturing capacity, process technology, and the foundry industry's largest portfolio of process-proven libraries, IP, design tools and reference flows.

TSMC currently operates two twelve-inch wafer fabs, four eight-inch fabs and one six-inch fab. The Company also operates two eight-inch fabs at its wholly owned subsidiaries, WaferTech in the U.S. and TSMC (Shanghai) Company, Ltd. in China, and has substantial capacity commitments from a joint-venture fab, SSMC, in Singapore. Total managed capacity in 2007 exceeds eight million eight-inch equivalent wafers. TSMC is the first foundry to provide 65-nanometer production capabilities. TSMC's corporate headquarters are in Hsin-Chu, Taiwan. More information about TSMC is available at <http://www.tsmc.com>.
